

Anveo and Microsoft Dynamics: Infrastructure Variants

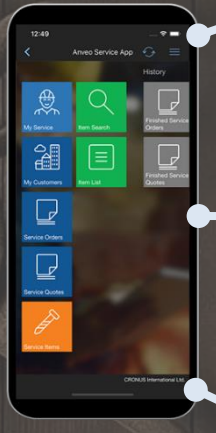

Overview of available infrastructure variants and available combinations

Managed (SaaS)
 No own server
 Software as a Service

Un-Managed (Self-Managed)
 Windows Server OnPrem,
 hosted or in the private
 cloud, e. g. Microsoft Azure
 Virtual Machine as an
 Infrastructure as a Service
 with specification of ports
 to be opened.
 Ports are configurable.

Requires in Dynamics
 Anveo Mobile App
 via **App Source** or
 Extension from BC 14
 with **Universal Code**
 (as of June 2022)

Requires in Dynamics the
 Anveo Client Suite Extension
without Universal Code or FOB.
 Supports Dynamics 2009R2 to BC.
 The Delta Service database is located
 in the **SQL server** of Dynamics.

If at least one "managed" component A and/or 1 is used, an Anveo subscription license from Anveo IT Services GmbH is required.
 If all components are self-managed (except AzureSQL), Anveo buying or subscription licenses are available via conion media GmbH.
